Summary

B.Tech graduate in Computer Science and Engineering (Data Science) with hands-on experience in Python, Django, FastAPI, ReactJS, SQL, and MySQL. Experienced in developing web applications, REST APIs, responsive user interfaces, and data-driven applications through internships and academic projects. Strong foundation in backend development, frontend technologies, database management, and problem-solving, with a focus on building scalable and user-friendly software solutions.

Education

RIET College
B.Tech – Computer Science and Engineering (Data Science)

2026
CGPA: 8.31

Technical Skills

Programming: Python, SQL
Web Technologies: HTML, CSS, JavaScript, ReactJS
Backend: Django, FastAPI, REST APIs
Database: MySQL
Tools: Git, GitHub

Internships

Miracle Software Solution
Web Development Intern

Python, FastAPI, ReactJS, HTML, CSS, JavaScript, SQL

- Developed web application components using Python, FastAPI, ReactJS, HTML, CSS, and JavaScript.
- Built responsive and user-friendly interfaces using ReactJS and modern web technologies.
- Developed and integrated REST APIs using FastAPI for backend functionality.
- Worked with SQL/MySQL for storing, retrieving, and managing application data.
- Used Git and GitHub for version control and development collaboration.

ExcelR
Django Intern

Python, Django, HTML, CSS, SQL

- Developed web application components using Python and Django.
- Created Django models, views, URLs, and templates to implement application functionality.
- Worked with databases to store, retrieve, and manage application data.
- Implemented CRUD operations and integrated backend functionality with web interfaces.
- Tested and debugged application components to improve functionality and reliability.

DataValley
Data Science Intern

Python, Pandas, NumPy, Scikit-learn

- Cleaned, preprocessed, and analyzed structured datasets using Python and data analysis techniques.
- Performed exploratory data analysis using Pandas and NumPy.
- Assisted in developing and evaluating machine learning models for prediction tasks.
- Applied feature engineering and data preprocessing techniques to improve model performance.

Projects

Student Management System
HTML, CSS, JavaScript, ReactJS, FastAPI

- Developed a full-stack student management application for managing student information and academic records.
- Built responsive and interactive user interfaces using ReactJS, HTML, CSS, and JavaScript.
- Developed REST APIs using FastAPI to handle application data and backend business logic.
- Integrated frontend components with backend APIs for efficient data management and user interaction.

Big Mart Sales Prediction
Python, Pandas, Scikit-learn

- Developed a machine learning model to predict product sales using historical sales and product-related data.
- Performed data preprocessing, cleaning, and feature engineering using Pandas.
- Trained and evaluated regression-based machine learning models using Scikit-learn.
- Analyzed prediction results to identify factors influencing product sales and improve forecasting.

Certifications

Python Bootcamp – Feb 2025
TATA IAM Forage – Apr 2025
Hackathon, BITS Pilani – Oct 2024
Cisco Python Essentials – Jun 2025
